

Creating a more comfortable place to work.

Who We Are

Humanscale has been designing award-winning ergonomic tools for the workplace for 25 years, creating groundbreaking products that make the workplace healthier and more comfortable for the user. Similarly, Humanscale Healthcare improves the work environment for caregivers by providing ergonomic work tools that support healthcare-specific technology.

A division of Humanscale, Humanscale Healthcare brings a unique perspective on human factors to the healthcare market. Our elite team of certified ergonomists and award-winning designers and engineers collaborate with medical providers throughout the United States to develop the most intuitive, body-friendly computer support solutions available to today's healthcare practitioners.

What We Stand For

Humanscale Healthcare draws from Humanscale's industry-leading expertise in workplace ergonomics and applies it to the clinical setting. With the proliferation of electronic medical records and technology-based treatments, caregivers today are using computers more than ever before. As a result, users in the healthcare environment face the same risks and challenges as those in the traditional office, plus one marked difference: Every piece of equipment in a clinical area is shared by multiple users every day. Humanscale Healthcare's award-winning technology solutions easily adapt to the unique needs of every caregiver to create a less physically stressful and more comfortable working environment.

Humanscale Healthcare and the Environment

Humanscale's commitment to the environment is deep-seated, particularly where healthcare is concerned. We believe that sustainable design is a key component in the healing process and excel at developing products that support green building standards. Nearly all of our solutions can be integral in the achievement of LEED certification.

Complementing the trend toward green hospitals and clinical facilities, Humanscale Healthcare's elegant ergonomic seating and work tools stand the test of time—both functionally and aesthetically—while consuming as little of the Earth's limited resources as possible. This is achieved through the design of products that weigh less, require few parts and manufacturing processes, and contain a high percentage of recycled and recyclable content. Our products are better for it, and so are your patients.

Monitor Supports

Offering effortless adjustment, perfect stability and sleek aesthetics, Humanscale's range of monitor solutions suits any workplace environment.

M2

With revolutionary mechanical spring technology, the M2 offers 10 inches of dynamic height adjustment, a 20-inch reach and a lightweight, ultra-thin profile that perfectly complements today's flat-panel monitors.

M4

Ideal for multiple-user workstations, the M4 features a dynamic arm that allows for quick and effortless adjustment of the monitor's height and depth.

M7E

The clamp-mounted M7E accommodates one 15- to 23-inch flat panel monitor, and offers dynamic height and depth adjustments.

M7H

The perfect solution for dual-monitor applications, the M7H supports two 15- to 23-inch monitors on a single post bolted to a work surface. Precise vertical adjustment of each monitor is achieved with our proprietary front-end adjuster (FEA).

Paramount

Designed for time- and money-saving installation and reconfiguration, Paramount offers a curved display for flexible ergonomic viewing of up to eight monitors on a single mount. *(Available Early Q2 2010)*

Rail System

The building block of a space-saving workstation, our Access Rail enables a multitude of combinations and easy, convenient arrangement of your desktop work tools.

Access Rail

Humanscale's Access Rail supports any number of ergonomic work tools, such as monitor arms, task lights, telephone supports, filing systems—even cup holders. Featuring virtually infinite configuration options, the Access Rail facilitates better organization for a more spacious, ergonomic work experience.

Wall Stations

Humanscale's ergonomic wall stations accommodate the technological demands of the clinical setting while encouraging patient/caregiver interaction at the point of care.

V7

The V7 Wall Station teams ergonomic comfort and safety with maximum flexibility. Offering an unparalleled 51 inches of effortless keyboard and monitor height adjustment, the V7 provides optimal positioning for caregivers in both sitting and standing positions.

V5

The V5 Wall Station supports ergonomic use of technology in tight spaces. Using as little as five inches of horizontal space when stored, the ADA-Compliant V5's one-touch independent adjustability of monitor and keyboard height and depth supports all users in both sitting and standing positions.

Mobile Computing

Our mobile technology solutions bring electronic medical records and technology-based treatments right to the point of care, while ensuring comfortable work conditions for caregivers.

T5 Point-of-Care Technology Cart

Humanscale's award-winning T5 combines unmatched mobility and comfort with a high-performance power system for both laptops and PCs. Designed to accommodate 99% of users in both sitting and standing positions, the T5 provides independent adjustability of the keyboard, monitor, work surface and overall cart height.

Seating

Redefining comfort and style, Humanscale's seating solutions break new ground in form and function.

Freedom Task Chair

Winner of 10 international design awards for its many revolutionary features and unparalleled ease of use, Freedom's groundbreaking design is the gold standard by which other task chairs are judged.

Liberty Task & Conference Chair

The first mesh seating solution to achieve full lumbar support without an external device, Liberty offers dynamically adjusting recline and innovative Form-Sensing Mesh Technology for exceptional body-fitting comfort.

Diffrient World Chair

Featuring unmatched performance and an advanced, minimal-part design, the Diffrient World chair provides ultimate simplicity for the user, the organization and the environment. *(Available Early Q2 2010)*

Freedom Saddle Seat

The most comfortable and versatile stool ever made, the Freedom Saddle's triangular cushion puts the spine into a healthy lordotic curve and reduces pressure points for long-term comfort.

Cinto Stacking Chair

Offering unprecedented comfort and ergonomic features for a chair in its class, Cinto moves with the body and minimizes pressure points for all-day sitting comfort in a convenient stacking chair.

Ergo Tools

Our range of high-performance ergonomic tools helps boost workplace efficiency, reduce fatigue and promote comfort.

6G Keyboard Support

The 6G provides intuitive adjustability and maximum stability in an ultra-slim design to enable healthy keyboarding and serious protection from carpal tunnel syndrome.

CPU600 CPU Holder

Humanscale's sleek and sturdy CPU600 helps keep valuable hardware safe and secure, and ports, cables and drives within convenient reach.

NeatLinks

The best solution for managing cable clutter, NeatLinks route and store myriad cables, power strips and ballasts for a safer and more organized workplace.

L6 Notebook Manager

Featuring a swivel base, wire management and effortless height adjustability, the L6 allows laptop computer users to enjoy desktop comfort. *(Available Late Q1 2010)*

Privacy Filters

Specifically designed for today's high-resolution monitors to minimize glare and improve contrast, our privacy glare filters help healthcare providers adhere to the latest HIPAA regulations.

Switch Mouse

The Switch Mouse represents a revolutionary advancement in ergonomic mouse design with features including size adjustability, an angled palm support, and left- or right-handed use.

FM500 Foot Machine

To offset the negative effects of sedentary work, the FM500 encourages a gentle rocking motion to improve circulation, reduce ankle swelling, and relieve lower back pressure.

Task Lighting

Humanscale's full line of energy-efficient task lights provides a variety of unique options to fit the needs of any workplace application.

Element

Through groundbreaking MCX LED Technology, Element is the first LED task light to meet ergonomic requirements. Rated for 60,000 hours of life—up to 30 years of 9-to-5 use—Element consumes less than seven watts of power.

Tolomeo LED Task Light

Featuring the same signature design that has become the Tolomeo trademark, the LED Tolomeo from Artemide offers incredible light output and energy efficiency. It consumes just 10 watts of power while producing as much light as 75 watts of incandescent lighting.

Diffrient Task Light II

Utilizing the latest ballast-in-bulb technology, the Diffrient Task Light II offers a perfect internal counterbalance for effortless one-touch positioning. Available with a single or double arm, its parabolic shade improves illumination and prevents glare.

Diffrient Work Light II

Available with a single or double arm, the Diffrient Work Light II features the longest reach on the market and a traditional screw-in socket to accommodate a wide variety of bulbs—including the latest compact fluorescent bulbs.

Diffrient Technology Light

With dual power outlets and an optional data port built into its base, the Diffrient Technology Light brings ultimate convenience to the desktop. Offering effortless adjustability, it was designed to accommodate the latest compact fluorescent lamps.

Discover The Humanscale Advantage

Introducing an employee incentive program that provides real benefits for your employees and your company.

The Humanscale Advantage Program:

- Provides your company with a valuable addition to your employment benefits
- Encourages healthy work habits—both at home and in the office
- Can help reduce workers' compensation claims

Program Highlights

The Humanscale Advantage Discount

As a Humanscale customer, your employees will receive corporate-level discounts when purchasing Humanscale's high-performance seating and ergonomic work tools on the Humanscale e-commerce site, shop.humanscale.com.

Promoting Healthy Work Habits

In addition to valuable discounts, Humanscale Advantage members receive workplace tips that promote ergonomic wellness to boost workstation comfort and prevent injury.

Promotional Tools

Humanscale makes it easy to promote your involvement in the Advantage program with a series of promotional tools—including an employee welcome letter and posters—that will keep healthy work habits and your valuable corporate discount on the minds of your team members on a regular basis.

With no commitment or costs to join, there's nothing to lose and plenty to gain with the Humanscale Advantage. Contact your Humanscale rep to enroll today.
